Poster Designer

Branding of Dawson College Model UN Committee, 2011-2012

Independent designer of YouTube channel brandings for an internet based clientele that I developed through social media, 2010-2012

PERSONAL

I don't just learn, I obsess. When I taught myself Photoshop, and subsequently the other major **Adobe Suite** products, that was all I thought about. When learning **HTML, CSS, Javascript and jQuery**, I made nine different websites that were never actually used, just to learn by doing. The same can be said with my experience learning **SASS.**

 I've found that when I combine my technical obsessions with my design background, I can produce great results. I'm not an artist, I'm a visual problem solver, and I love to learn from other people who are better than me, and to be able to apply that newfound knowledge to interesting projects.
